

Need Training in Working at Heights/Confined Space?

The SpanSet Modular Training approach has been set up to offer a clearer explanation of the options available in Height Safety, Confined Space, Inspection, Evacuation and Vertical Rescue training. This modular approach allows Spanset to deliver consistent and concise training specific to the client's needs. Extra modules can be added into the training to further enhance the candidate's skills.

SpanSet trainers are highly qualified personal all with extensive industry experience, both locally and internationally. SpanSet delivers training across a wide range of industries such as mining, telecommunications, theatre, councils, government authorities, power authorities, construction and oil and gas drilling rigs.

SpanSet are leaders in the development of rescue and evacuation training, with training ranging from half day to 3 day vertical rescue courses targeting both industrial and recreational markets.
